

Noble Growth Fund UCITS

Fund Description

Noble Growth Fund (the Fund) is a commodity focused fund based in the Principality of Liechtenstein, an attractive European Jurisdiction.

The investment objective of the fund is to achieve long term capital appreciation via investment exposure in real assets, digital assets and associated technologies and infrastructure. The correlation of the portfolio is expected to be low or negative to traditional asset classes.

Portfolio Comment

The strategy thesis: In the long run, fiat currencies will diminish in value as central bankers will fail to exercise monetary and fiscal responsibility. In this environment, real assets and digital assets will outperform. Precious metals and digital currencies will increasingly fulfil the store of value and medium of exchange functions and will grow in importance as part of the global monetary base. The Noble Growth Fund was set up to give investors access to blockchain technologies and eligible digital assets, enhanced by the added diversification of precious metals and mining stocks.

During the month we have invested in certificates which track gold, bitcoin, and multi-crypto assets. Through ETFs we have exposure to 45 mining companies. We also have bought equity in Hecla Mining and in Franco Nevada, a precious metals royalty company. We look for asymmetric profiles in which companies have operational gearing to the metal prices. We have exposure to major and secondary companies in the blockchain technology, mining and financing businesses,

We expect this portfolio mix to be uncorrelated or negatively correlated to equity indices. This proved to be the case in market moves associated with middle east tension in early January and with coronavirus developments late in the month.

No liability is assumed or accepted in relation to any loss or damage that may arise, directly or indirectly, from the distribution or use of this product information or its contents.

Investing in investment funds carries with it the risk of price losses and currency losses, so that the future value of units may rise or fall in relation to their value at the time of acquisition. In so far as any statements are made concerning market developments, returns, price gains or other instances of asset growth, as well as risk ratios, these merely constitute forecasts for which we accept and assume no liability as regards the actual occurrence of the events predicted. In particular, previous performance, simulations and/or forecasts cannot be taken as a reliable indicator of future performance.

Full details concerning the Fund can be found in the key investor information and the sales prospectus, together with the latest audited annual report and, where data exist which are more recent than those contained in the latest annual report, the latest half-yearly report. These documents constitute the sole binding basis for any acquisition. In so far as any tax or legal interests are affected, these should be discussed by the addressee with his/her tax adviser or lawyer.
