

### Investment objective and investment policy

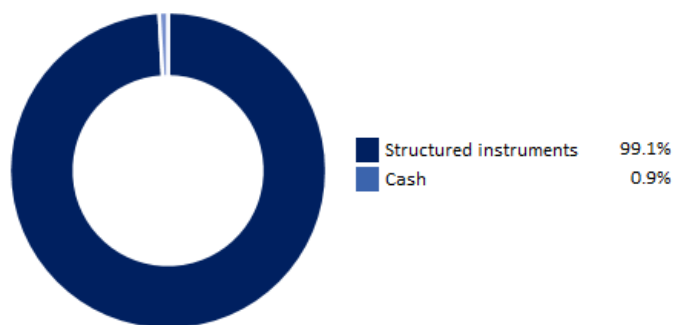

The investment objective of the fund is to generate a sustainable return as an alternative to traditional investments. The fund may invest its assets indirectly via certificates, target funds or one or more special purpose vehicles in predominantly credit-insured trade finance assets. Moreover, the asset manager is free to invest in all eligible investments worldwide in accordance with the legal basis and the constituent documents, subject to the following investment restrictions. The investment strategy can therefore be strongly focussed on a single investment or a small number of investments. At the same time, however, it is also possible to invest primarily in target funds so that the sub-fund can have a fund of funds structure. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
